## Principal's Message

Welcome to our fifty-five years celebratory school publication. In my capacity as the serving Principal of this school it gives me great pleasure to be involved in the school during this momentous year of reflection. When the foundation stone was laid in 1967, how many people watching that momentous occasion would have thought that school then being built would go through so many changes and still be operating in 2023. It is amazing to think that our school has occupied the same site for half a century and all of the events of history that have occurred in this time frame. Hong Kong has grown and changed and moved with the times as has this wondrous school. Equally it is impressive to think of the vast numbers of children who have walked through our doors and the positive impact that this school had on their lives. To celebrate 55 years we think of gold and I believe that this school has been a gold mine of success in achieving 55 years in its various formats. Congratulations to all the teachers who have worked and those currently working in the school as well as the support staff and the multitude of organizations that have been involved and supported the school over our fifty-five years. Please enjoy our fifty-five years of reflection.

## Vision and Mission

To provide education for students from all walks of life and of different cultures. We tailor our teaching to their diverse needs so that their talents and potential can be fully developed. The school motto is based on honesty and honour. The students are expected to conform to these virtues as a basis for their future development.

Principal Cheung is one of our closest partners. Together with her, her teachers and the regional/district principals' associations, a lot have been done for the community—for youngsters. I would not forget the large scale musical we have lined up for students of different ethnicities to learn Chinese culture through acting. This is just one of the many examples where she leads the School and the sector to promote inclusiveness in Yau Tsim Mong and beyond. She has set a very high standard for her predecessor to follow, in maintaining the reputation being enjoyed by the Yaumati Kaifong Association School. We will miss you, Mimi.

I congratulate Ms. Cheung Y. M. Mimi, JP, Principal for the successfully completion of her tenure, she played a rule to improve the school standard and welcome EM students in the school.

## Yaumatei Kaifong Association School Inscription for the 55<sup>th</sup> Anniversary and Retirement of Principal Mimi Cheung

The Yaumatei Kaifong Association School (“YMTKFAS”) was established in 1967 and is celebrating its 55th anniversary along with the retirement of its long serving principal, Mimi Cheung.

Our Harilela family and The India Association Hong Kong of which I am its past president, have been proud to be associated with the school. Mimi has been a tremendous guiding light for the school and its students, helping them achieve a smooth transition from primary education to secondary schooling and beyond. She has also managed a team of educators and support staff to work together creating a harmonious environment from which the students thrive.

YMTKFAS plays a seminal role in laying the educational foundations for which the ethnically diverse student body can succeed in furthering their education. For example, learning Chinese is especially difficult when young students come from non-Chinese speaking families. YMTKFAS provides crucial learning support for these early year students without which it makes furthering their studies that much more challenging.

Our family and The India Association Hong Kong have been strong supporters of YMTKFAS and we hope to continue being associated with such a delightful school. We understand Mimi will be retiring and we offer our highest congratulations on her years of service. She will be missed but we shall always remember her hard work and determination in ensuring the success of her student body.

Our warmest congratulations to the YMTKFAS on achieving this milestone and we wish it every success going forward and under new leadership.

I take this opportunity to applaud you for all the effects and positive impacts you have made on the life of numbers of students you have touched. Every end has a magical new beginning. ## YAUMATI KAIFONG ASSOCIATION SCHOOL 55<sup>th</sup> Anniversary

Congratulations to Yaumati Kaifong Association School on its 55th Anniversary Celebrations!

My journey with the school began in 2001 when my son was enrolled in P1. During my time in the PTA, I have noticed and admired the school's unwavering mission to provide education for the betterment of Ethnic Minorities in Hong Kong.

That school has reaped the fruits of its commitment as many of the YMTKFAS alumni are now contributing members of our society as teachers, engineers, architects, police officers and many more.

Kudos to the principal and teachers for the determination in attaining such a feat!

Our school's sponsoring body, the nonprofit-making Yau Ma Tei Kaifong Association, established Yaumati Kaifong Association School as an aided school in Yau Ma Tei in 1968. The foundation stone of the building was laid in August 1967 and work was completed for the school to open in 1968. The school catered for local students from 1968 until 1997 when it was forced to close due to falling enrollments.

However, due to the concerted efforts and beliefs of the sponsoring body and the school supervisor, the school was reinstated by the Education Department to reopen in 1998. During this new phase the school operated six classes for Chinese speaking students and six classes in English to cater for ethnic minority students from the surrounding area.

In 2003, work commenced under the government funding to build additional rooms that would offer a visual arts room, school library, music room and a multimedia learning center, the school was then able to offer a higher standard of education for its students. During this time period, the demographics of the surrounding area had changed and the enrollment of ethnic minority students was increasing. In 2006 to 2007 academic year, the school was identified as one of the designated schools catering for non-Chinese

students in Hong Kong. In 2008 to 2009 academic year, all twelve classes were operating in English as the medium of instruction.

From 2011, with sponsorships from the benefactors in the community, our performing arts room was newly established, language room and computer room was modernized and all computers were upgraded to offer better I.T lessons to our students. Currently the school has an enrolment of over 400 students operating in 12 classes.

The school is always sensitive to the changes in education reforms and plays an active role in the affairs and events of the local community. The school stresses the importance of unity, harmony and respect as the cornerstone of learning for all students. We place the interest and needs of the students and parents as the paramount focus of the school. The school is able to achieve these foci through the leadership of the School Management Committee, the School Principal and the dedication of the school teachers and support staff.

## Chinese

Our school collaboratively with the School-based Support section of EDB and used the “EDB Chinese Language Curriculum Second Language Learning Framework” to develop our P. 1 – P. 6 school-based curriculum and the Chinese Layered-teaching Activities. These not only cater for students’ learning needs, but also to arouse our students’ interests and abilities in learning Chinese.

On the other hand, our school provides different learning programmes to enhance students’ learning abilities in Chinese such as “Summer Bridging course”, “Chinese Culture Day”, “Chinese story-telling” etc.

Furthermore, our school provides different experiences in aspects of main stream Chinese culture, through visiting Hong Kong Palace Museum and Organizing activities such as Lion Dance, Chinese Dance, Chinese calligraphy competition, Chinese Speech Festival, national flag-hoisting ceremony etc.

Last but not least, our school believes that all our teachers will be devoted to building up the students’ Chinese ability and we hope students can enjoy their Chinese learning experience.

Group work activities during co-teaching lessons.

## English

Our students' English education starts with their reading skills in lower primary. In primary one to three, we equip them with phonics, sight words, and comprehension skills, and expose them to diverse age-appropriate books and genres. To nurture their reading abilities, teachers inculcate various strategies like reading aloud, shared reading, guided reading, and group activities. These techniques not only infuse imagination and creativity in the students but also foster their interest in literature.

The upper primary curriculum aims to enhance students' writing proficiency by building on their basic reading skills. During primary four to six, emphasis is placed on developing their grammar, vocabulary, and sentence construction abilities to create coherent and impactful written works. Teachers use activities such as storyboarding, brainstorming, and self/peer editing to make writing enjoyable and creative. This allows children to experiment with different writing styles and language usage.

Students practicing their drama moves with the school NET.

Plenty of emotions and creativity during a drama lesson.

The school curriculum places a significant emphasis on language arts, which is crucial in providing students with the necessary skills and tools to enhance their communication, critical thinking, and self-expression abilities. Our school actively engages students in public poetry reading contests, inter-school drama competitions, and short film competitions to foster their expressive abilities in a coherent and meaningful way. These activities encourage students to explore their thoughts and ideas with clarity and structure, promoting effective communication.

## Mathematics

In order to strengthen students' ability to integrate and apply knowledge and skills, Maths Department arranges different activities for students every year.

Our department also helps and encourages the potential students to participate in training program and competition.

Students had different learning experiences on our Maths Day.

P.2 STEM Activity-Making the tallest tower. The aim of the activity is to enhance the cognition of the characteristic of different 3-D shapes.

Students collected different boxes (3-D shapes) to make their tallest tower. They needed to think how to pile up the boxes according to the size and shape of the boxes.

We trained and arranged all P.6 students to be helpers. They learned how to guide the junior students to finish different tasks on Maths Day.

Physical Education curriculum is designed according to the key learning areas. Primary one to primary three students can learn fundamental movement. Primary four to primary six students can learn ball games, fitness training, gymnastics and track and field.

To promote the healthy lifestyle, students are encouraged to participate in physical activities. They not only learn the sports skills but also keep fit. They can join in various sports activities, such as sports fun day, inter-school sports competitions, and newly emerged sports.

Inter - Primary School 3 on 3 Basketball Competition

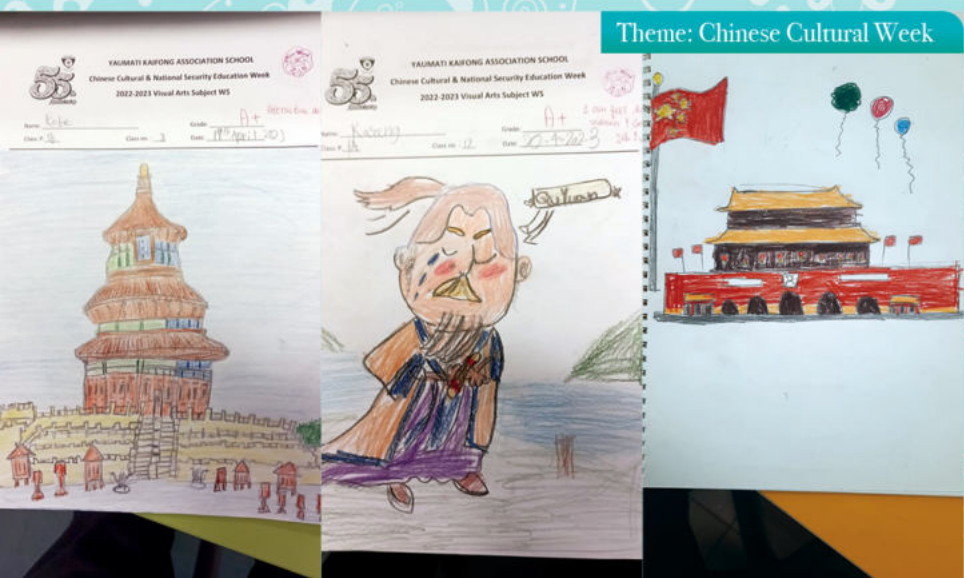

## Visual Arts

Our VA curriculum aims to develop students' perceptual abilities, with special emphasis on visual and aesthetic experience, to enable students to express personal feelings and thoughts through artistic presentations and to strengthen students' abilities to appreciate various forms of visual arts work aesthetically and critically.

## Music

To cater the unique need of our non-Chinese speaking (NCS) students, we developed a school-based music curriculum using English as a medium of instruction. In recent years, our music teachers are invited by the Education Bureau to share our experiences about NCS music curriculum development, as well as learning and teaching strategies of recorder playing in workshops for in-service teachers. To provide opportunities for students to enjoy music activities, various extracurricular activities are held, these includes "Amazing Voice" (a junior vocal ensemble), Chinese folk songs class, recorder team and many others. Students joined inter-school competition like the Hong Kong Schools Music Festival and received encouraging results. Inside the school, we arranged live music appreciation events as well as "Music from China" online competition.

Facilitating self-understanding and establishing positive self-value through activities.

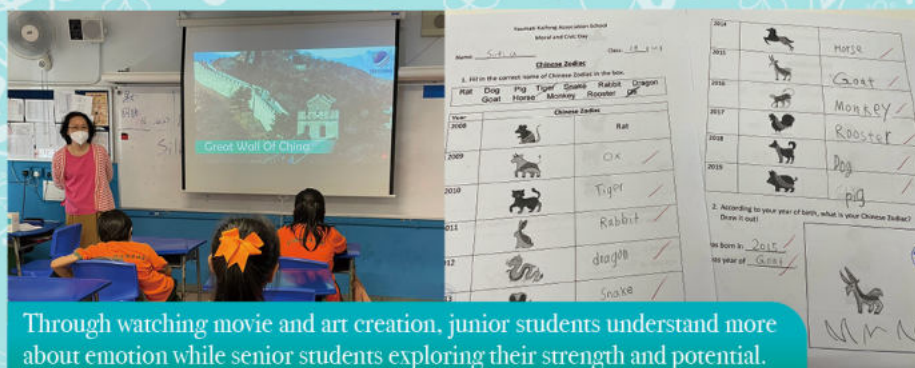

## Moral and Civic

Moral and Civic lessons aim at establishing students' positive value on their personal growth and developing students' social responsibilities. Through interactive and reflective activities, students learn from individual, interpersonal, social and national areas.

## Library

The mission of school library is to cultivate a favorable reading environment, to develop students' reading habits and to enable students to become lifelong learners. Our library is also responsible for enhancing learning and teaching across the curriculum.

Through watching movie and art creation, junior students understand more about emotion while senior students exploring their strength and potential.

Cooperating with organization to promote public health and public safety.

## Information and Communication Technology

To face the growing digital economy era in the future, STEAM education helps to develop the necessary knowledge, skills, and attitudes among students. Coding education is also able to develop student's computational skill and to solve the real-life problems.
